PROJECTS

Hospital Management System

- Duration : 45 days
- Technology : Web Technology
- Role : Team Leader
- Project Description : The Hospital Management System is a website which is made to reduce the burden of people in society. It contains all the details of the experts in various departments and in doing various surgeries. It also contains all the information of patients.

Online Project Approval System

- Duration : 90 days
- Technology : Web Technology
- Role : Team Leader
- Project Description : The main objective of the student project allocation system is to make an internet based system which will provide information of each student to institute with ease. This project will provide an effective and efficient way to manage data with low cost. The system contains various options such as login/logout, data management by grouping same type of data, online test, etc. which will give an interactive experience to users. It will be secure with a password so the data can be used by only those who have an id and password while the data will be maintained in the system for a long period of time.
